

Juan José Cano Duque

Software Engineer · QA Automation Lead · AI Driven.

jjcadu@gmail.com · [/juan-jose-cano-duque](https://juan-jose-cano-duque) · Medellín · Remote

Open to new opportunities — Available now · Global remote · EOR-friendly

A decade of building, breaking, and automating production systems — from team-led Java backends to AI-powered tooling for global brands. Driven by a hunger to keep learning, ship quality at scale, and let machines handle the boring parts.

CAPABILITIES

IN-HOUSE · SDLC

Embed agentic AI across your dev cycle.

Rewire SDLC loops — dev, testing, code review, releases — around agentic primitives. Daily drivers, not pilot decks.

TOOLING · INTEGRATION

Build the tools that fit your stack.

Slash commands, hooks, MCP servers, internal CLIs. New AI tech ships weekly; I integrate it so the team feels the speed, not the friction.

CONSULTING · DELIVERY

Transform workflows for your customers.

Same playbook, applied to the teams you serve. Embed, ship the change, leave behind workflows that compound.

SELECTED WORK

Senior Test Automation Engineer

Yuno · Fintech · Hybrid · Colombia

Dec 2025 — Mar 2026

- **AI-Augmented Development:** executed high-stakes workflows inside a demanding **agentic AI environment** serving the international financial industry.
- **SDLC optimization via agents:** leveraged AI agents as the primary interface across the full software lifecycle — building, testing, debugging and rapid issue resolution.
- **Feature delivery with agents:** shipped new product features by orchestrating AI agent tools to keep velocity and precision high in a complex landscape.
- **Technical resilience:** thrived in a fast-paced, high-pressure setting, consistently meeting the rigorous **security and performance standards** of global fintech.

Agentic AI · Fintech · SDLC Automation · Agentic Tooling · High-velocity QA

QA Automation Lead

Globant · British Airways

2024 — 2025

- Designed and implemented a new **UI testing framework** for a complex, multi-team airline product.
- Acted as **QA focal point**, leading integration and stakeholder relationships across multiple teams.
- Improved integrations across **GitHub Actions, BrowserStack, WDIO 9** and internal libraries.
- Already integrating **AI tooling** into QA workflows before it became mainstream.

WDIO 9 · TypeScript · BrowserStack · GitHub Actions · AI Tooling

Senior Test Automation Engineer

Globant · Disney Streaming

2023 — 2024

- Led the strategic **refactor of a metadata automation framework** — **+20%** faster execution, **+30%** faster test development.
- Directed **QA best practices** rollout, increasing stakeholder confidence in the testing process.
- Interviewed and onboarded engineers to grow the team.

Spinnaker · Java · QA Strategy

Senior Test Automation Engineer

Globant · Deluxe Entertainment

2019 — 2023

- Designed and executed automation strategies for a **cluster of critical APIs and UIs** using Python & Selenium.
- Pioneered and led new automation projects with **Playwright**.
- Mentored and onboarded **Junior Automation Engineers**.

Python · Selenium · Playwright · Mentorship

Java Developer · Team Lead

H.M Solutions

2017 — 2019

- Led a small team building a **full ERP suite** — digital invoicing, inventory, purchases, sales and payroll — in Java.

Java · Team Lead · ERP

Web Developer

Ingenisoft

2014 — 2016

- Built a municipal **public lighting management system** using PHP and the Google GPS API.

PHP · Google Maps API

SELECTED PROJECTS

AI · ACCESSIBILITY

Sign-language transcription model

Fine-tuned a sign-language transcription model for an NGO in Argentina — early hands-on work with vision models for real-world social impact.

NGO · Argentina · 2023

AI · PRODUCTION

Student-facing RAG chatbot

Built and shipped a RAG system currently running in production as a student-facing chatbot for a university in Colombia.

University · Colombia · 2024

SDET · AI WORKFLOWS

Agentic dev cycle, end to end

Mastered agentic AI tools across the full development cycle as an SDET — building, fixing, and orchestrating solutions across the codebase, not just filing tickets.

Internal · 2024 → · SDET

TOOLKIT

Honest read on where I am today — calibrated by what I touch most, not by what looks best on paper.

Currently Sharp / daily, last 12 months

Agentic AI Tools	Daily Driver
TypeScript / JavaScript	Daily
Playwright · WDIO 9	Daily
GitHub Actions · CI/CD	Weekly
BrowserStack	Weekly

Recent & Confident / last 1-3 years

Python	Solid · refresher away
Selenium	Solid · ramp-back ready
API Testing	Comfortable
RAG Systems	Shipped to production
Model Fine-tuning	Applied
SQL · Data Modeling	Solid

Foundational / shipped with, will ramp

Java	Foundational
Algorithms & Data Structures	Degree-grade
ML Modeling · Data Analysis	Applied

Leadership & Way of Working

Mentoring engineers	5+ yrs
Stakeholder management	Daily
Async / remote workflow	Native
Hiring & interviewing	Disney era
QA framework focal point	20+ active SDETs

EDUCATION & LANGUAGES

Master — Data Science

CEUPE · 2023
Focused on data analysis & ML modeling — the foundation behind production RAG and fine-tuning work that followed.

Bachelor's Degree — Computer Science

Unisabaneta · 2018
Strength in algorithms — the backbone behind framework design and performance refactors.

Español: Native
English: Advanced · C1
Off-keyboard: Dance · Music

“I write production code, and I know how to test it. Building, automating, and optimizing is something I genuinely enjoy doing.”
— Juan José
