

● OPEN TO NEW OPPORTUNITIES — AVAILABLE NOW · GLOBAL REMOTE · EOR-FRIENDLY

Juan José Cano *Duque*.

Software Engineer · QA Automation Lead · AI Driven. A decade of building, breaking, and automating production systems — from team-led Java backends to AI-powered tooling for global brands. Driven by a hunger to keep learning, ship quality at scale, and let machines handle the boring parts.

DOWNLOAD PDF

IN-HOUSE · SDLC

Embed agentic AI across your dev cycle.

Rewire SDLC loops — dev, testing, code review, releases — around agentic primitives. Daily drivers, not pilot decks.

TOOLING · INTEGRATION

Build the tools that fit your stack.

Slash commands, hooks, MCP servers, internal CLIs. New AI tech ships weekly; I integrate it so the team feels the speed, not the friction.

CONSULTING · DELIVERY

Transform workflows for your customers.

Same playbook, applied to the teams you serve. Embed, ship the change, leave behind workflows that compound.

§ 02 — SELECTED WORK

A career, in *layers*.

• DEC 2025 — MAR 2026

Senior Test Automation Engineer

Yuno · Fintech · Hybrid · Colombia

[/juan-jose-cano-duque](https://juan-jose-cano-duque.com)

- **AI-Augmented Development:** executed high-stakes workflows inside a demanding **agentic AI environment** serving the international financial industry.
- **SDLC optimization via agents:** leveraged AI agents as the primary interface across the full software lifecycle — building, testing, debugging and rapid issue resolution.
- **Feature delivery with agents:** shipped new product features by orchestrating AI agent tools to keep velocity and precision high in a complex landscape.
- **Technical resilience:** thrived in a fast-paced, high-pressure setting, consistently meeting the rigorous **security and performance standards** of global fintech.

SDLC Automation

Agentic Tooling

High-velocity QA

2024 – 2025

QA Automation Lead

Globant · British Airways

- Designed and implemented a new **UI testing framework** for a complex, multi-team airline product.
- Acted as **QA focal point**, leading integration and stakeholder relationships across multiple teams.
- Improved integrations across **GitHub Actions**, **BrowserStack**, **WDIO 9** and internal libraries.
- Already integrating **AI tooling** into QA workflows before it became mainstream.

WDIO 9

TypeScript

BrowserStack

GitHub Actions

AI Tooling

2023 – 2024

Senior Test Automation Engineer

Globant · Disney Streaming

- Led the strategic **refactor of a metadata automation framework** — **+20%** faster execution, **+30%** faster test development.
- Directed **QA best practices** rollout, increasing stakeholder confidence in the testing process.
- Interviewed and onboarded engineers to grow the team.

Karate Spinnaker Java QA Strategy

2019 – 2023

Senior Test Automation Engineer

Globant · Deluxe Entertainment

- Designed and executed automation strategies for a **cluster of critical APIs and UIs** using Python & Selenium.
- Pioneered and led new automation projects with **Playwright**.
- Mentored and onboarded **Junior Automation Engineers**.

Python Selenium Playwright Mentorship

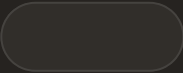

2017 – 2019

Java Developer · Team Lead

H.M Solutions

- Led a small team building a **full ERP suite** — digital invoicing, inventory, purchases, sales and payroll — in Java.

Java Team Lead ERP

2014 — 2016

Web Developer

Ingenisoft

— Built a municipal **public lighting management system** using PHP and the Google GPS API.

PHP Google Maps API

§ 03 — SELECTED PROJECTS

Things I'm *proud of.*

AI · ACCESSIBILITY

Sign-language transcription model

Fine-tuned a sign-language transcription model for an NGO in Argentina — early hands-on work with vision models for real-world social impact.

NGO · ARGENTINA

2023

AI · PRODUCTION

Student-facing RAG chatbot

Built and shipped a RAG system currently running in production as a student-facing chatbot for a university in Colombia.

UNIVERSITY · COLOMBIA

2024

Agentic dev cycle, end to end

Mastered agentic AI tools across the full development cycle as an SDET — building, fixing, and orchestrating solutions across the codebase, not just filing tickets.

INTERNAL · 2024 →

SDET

§ 04 — TOOLKIT

What I reach for *first*.

Honest read on where I am today — calibrated by what I touch most, not by what looks best on paper.

§ 05 — EDUCATION & LANGUAGES

Formally *curious.*

Master — Data Science

CEUPE

2023

Focused on data analysis & ML modeling — the foundation behind production RAG and fine-tuning work that followed.

Bachelor's Degree — Computer Science

UNISABANETA

2018

Strength in algorithms — the backbone behind framework design and performance refactors.
